

Wellcome Trust Sustaining Health

Saskia Heijnen
June 2014

Sustaining Health Criteria

- Interdisciplinary research proposals
- Address health and sustainability challenges, specifically at the nexus between health, nutrition and the environment.
- Based around valid, evidence-based science for which health impacts are a key outcome.
- Up to £250,000 for a maximum of two years.
- Global eligibility

Highlights

- *The health impacts of climate change mitigation and adaptation measures*
- *How to feed 9 billion*

Projects outside of these sub-themes, but relevant to the Sustaining Health area in other ways, are also welcomed

Application Process

Concept note deadline July 25, 2014

Sustaining Health

Defining *our* future world

We support pilot research projects that clarify the health risks related to the environment and nutrition and that seek to develop solutions.
